Making Half Square Triangle Units Step by Step

To make half square triangle units for this quilt you will use two squares of fabric placed right sides together. To make the process easier, arrange the squares you have cut into piles determined by the numbers from your sample page. Pick squares from the piles to make the appropriate combinations.

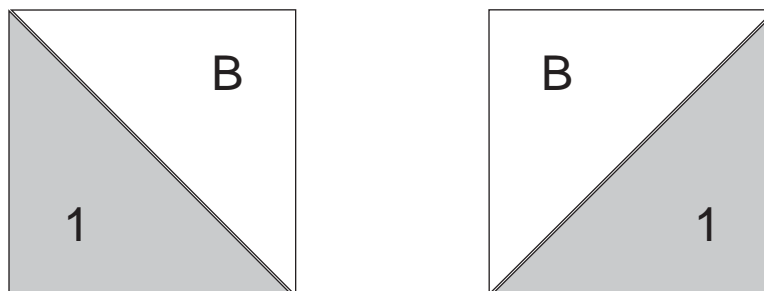

The example shown uses one square of fabric #1 and one square of background fabric to make two half square triangle units.

Choose the lighter of the two fabrics and draw a diagonal line corner to corner on the wrong side of the fabric. Place the two squares right sides together. Sew 1/4" away from the drawn line. Cut on the drawn line. Press seams to the dark. When drawing the line on each square it is helpful to place the square of fabric right side down on a piece of fine sandpaper. The sandpaper holds the fabric and keeps it from slipping and stretching.

Results in two half square triangle units
